Know about us

"Welcome to AdvancePLY, a legacy in the plywood and laminate industry that began its journey in 1991 as Amba Industries Private Limited, founded by the visionary Salhotra brothers - Mr. Rakesh, Mr. Praveen, and Mr. Subhash. What started as a manufacturing unit for plywood, doors, block boards, and shuttering plywood under the brand name Advance in Ghaziabad, has evolved into Amba Panel India Private Limited, a name synonymous with quality and innovation.

With a rich history spanning over three decades, AdvancePLY has embraced change and modernization. We have spearheaded our transformation by integrating state-of-the-art machinery, cutting-edge technology, and innovative processes at our expansive manufacturing facility in Hapur, just a short drive from New Delhi.

Our commitment to excellence is evident in our latest offering - calibrated plywoods featuring **HEXAPRO TECHNOLOGY**, designed to exceed customer expectations with uncompromising quality and transparency. AdvancePLY products have become the preferred choice for homeowners, architects, contractors, carpenters, and OEMs alike.

EDGEMATCH

Advance EdgeMatch is a refined PVC edge banding solution created for interiors that demand flawless detailing. Engineered for seamless integration with modern panels, Advance EdgeMatch delivers a precise edge finish that enhances both form and function. Its superior material composition ensures smooth application, lasting adhesion, and enduring color stability—preserving the integrity of furniture over time. From contemporary kitchens to bespoke furniture and commercial interiors, Advance EdgeMatch completes every surface with elegance and restraint. Backed by Advance's legacy of quality and innovation, Advance EdgeMatch is designed for professionals who appreciate precision, balance, and understated luxury.

Advance EdgeMatch - Tough Edge, True Match

TECHNICAL SPECIFICATION FOR PVC EDGE MATCH

STANDARD SIZES

Product name / description

PVC edge-banding tape - flexible decorative PVC strip for covering cut edges of furniture panels. Available plain, wood-grain, textured or high-gloss finishes; roller wound in coils or rolls.

Material Composition

- **PVC Base Polymer:** PVC for consistent flexibility.
- **Reinforcement Filler:** Controlled micron-size Calcium carbonate for stiffness & stability.
- **Stabilizer System:** Non-toxic Ca/Zn stabilizers for long life & heat durability.
- **Backside Primer:** Dual-coat adhesion promoter for strong glue grip.
- **Surface Finish:** Scratch-resistant and UV-stable coatings.

DIMENSIONAL SPECIFICATION

A. THICKNESS

Thickness range	0.45 ~ 2 mm
Thickness stability	±0.50 mm

B. WIDTH

Width Range	22 ~ 55 mm
Width Tolerance	±0.45 mm

C. ROLL LENGTH

As per customer Requirement. From 25 ~300 meters.

“Each roll is calibrated using digital laser alignment for true straight-line accuracy.”

Properties

Sr.No.	Testing Parameters	Specification	Test Method
01	Density	1.45~1.60 g/cm ³	EN ISO 1183-1:2004
02	Adhesion Test	The edges of the cuts are completely smooth, none of the squares of the lattice is detached.	ISO: 2409-2020
03	Dimensional stability	- Change in thickness – 3% - Change in mass – 0.65%	ASTMD 2126:2009
04	Tensile Strength	29.90 Mpa	ISO 527
05	Tensile Modulus	248.4 Mpa	ISO 527
06	Elongation at break	30.5 Mpa	ISO 527
07	Impact Strength	4.7 kj/m ²	ISO 179-11
08	Shore Hardness	70	ISO 868-2013
09	Peel Strength	Min 10-15 N	After 24 hrs Curing
10	Vicat softening temperature test	95.5°C	ISO 306:1994
11	Heat Resistance	No deformation up to 55~60°C	Visual evaluation
12	Flame Retardancy	Self-Extinguishing	UL 94 V-0/V-1 General FR property
13	Burning Behavior	Melts but does not sustain flame	Plastic drip without fire
14	Smoke emission	Reduce smoke	Compare to normal PVC
15	Colour stability	≤ 1.0	Batch to batch consistency
16	Chemical resistance	Resistance to mild acids cleaners	House hold grade
17	Thermal expansion	Low	ASTM D696
18	Water Absorption	≤0.5%, Avoid swelling or warping	ISO 62
19	Gloss level	Matt/High gloss as per requirement	Gloss Meter

“Each roll is calibrated using digital laser alignment for true straight-line accuracy.”

Edge Band Processing Characteristic

Sr.No.	Testing Parameters	Range	Purpose
01	Edge band Temperature	18~25°C (Room temp.)	Avoid cracking during feeding
02	Pre Heating requirement	Optional slight warm up	Ensure smooth bending in winter
03	Glue type compatibility	PVC based	
04	Glue application temperature	120°C	For proper melting and wetting
05	Trimming temperature stability	No deformation during trimming	Maintains edge shape while trimming
06	Heat Resistance during processing	Withstand heat of hot air blower	Avoids melting and softening
07	Flexibility during curing	Good (Depend on thickness)	Suitable for mild curve and internal radius
08	Shore Hardness	Excellent	Allow high gloss finished without mark
09	Colour Stability during processing	No shade variation after heating	Ensure uniform look after edge sealing
10	Dust free cutting	Yes	Reduce chipping & burning on edges

“Optimized for high-speed processing with excellent glue compatibility and flawless trimming performance.”

Edge Band Printing Characteristics

Sr.No.	Properties'	Specification	Technical Notes
01	Printing Method compatibility	UV-printing/Digital printing	Support multi-layer surface
02	Ink Adhesion strength	High (No peel off during trimming)	Ensure long term print durability
03	Ink type	UV curable or water based	Depending on gloss/ matte requirement
04	Print layer thickness	8~15 micron	Maintain flexibility & colour depth
05	Texture printing clarity	High definition	Reflect natural wood grain patterns
06	Heat Resistance after printing	No printing fading up to 150°C	Safe for hot melt processing
07	Scratch resistance on printing layer	3H-4H	Avoids mark during trimming
08	UV light stability	No yellowing	Maintains original color
09	Lamination Bond strength	Strong bond b/w print layer & base layer	Prevent delamination
10	Moisture resistance	100% Non-absorbent	No swelling, no bubble formation

“Premium UV-stable printing with exceptional ink bonding and precise colour consistency.”

Safety & Compliance

Non-Toxic Printing Inks

All printing inks used in decoration and grain printing are UV-stable, food-contact safe, and free from harmful solvents, ensuring zero health risk after installation.

Odour-Controlled & Plasticizer-Safe

Controlled formulation ensures minimal odour release and uses non-phthalate-based plasticizers for improved safety and sustain ability.

Eco-Friendly Manufacturing

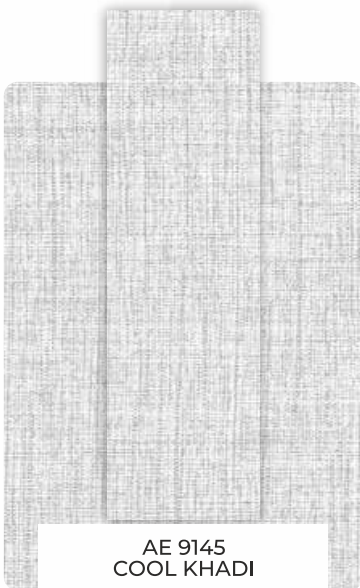

Production follows low-waste and energy-efficient processes with recycling of scrap materials to minimize environmental impact.

“Premium UV-stable printing with exceptional ink bonding and precise colour consistency.”
